pratiknimbalkar7997@gmail.com

PROFESSIONAL OVERVIEW

Software Engineer with **3+ years** of experience in **designing**, **developing**, and maintaining scalable web applications using **ASP.NET Core**, **.NET Core**, **C#**, **SQL Server**, **Angular**, and **Microservices Architecture**. Experienced in building **RESTful APIs**, implementing **Clean Architecture**, **Repository Pattern**, **Dependency Injection**, **JWT Authentication**, **Entity Framework Core**, and developing scalable **microservices-based applications**. Skilled in **Docker**, **Jenkins**, **SonarQube**, **Nexus Repository**, **Git**, **Postman**, **Swagger**, and **CI/CD**. Passionate about building secure, scalable enterprise applications and continuously enhancing expertise in **Azure** cloud technologies.

SKILLS

Programming: C#, JavaScript, TypeScript.

Frameworks & Technologies: ASP.NET Core MVC, ASP.NET Core Web API, Entity Framework Core, LINQ, ADO.NET, Dapper, Redis Cache.

Architecture & Design: Clean Architecture, Microservices Architecture, Repository Pattern, Dependency Injection, SOLID Principles, Design Patterns.

Cloud & Azure: Microsoft Azure (Azure Functions, Azure Service Bus, Azure SQL Database, Azure Storage)

Database Management: MS SQL Server 2019, MySQL.

Front-End: Angular, HTML, CSS, jQuery, Bootstrap.

DevOps & CI/CD: Docker, Jenkins, SonarQube, Nexus Repository, Git, GitHub.

Tools: Visual Studio, Visual Studio Code, Git, JIRA, Swagger, Postman.

Testing: nUnitTest, xUnitTest

PROFESSIONAL EXPERIENCE

VHAASH TECHNOLOGIES PVT LTD

Software Engineer Mar 2023 – May 2026

Project: LEARN & GROW (E-Learning Platform)

Project Overview: -

Learn & Grow is a modern Learning Management System (LMS) built to simplify digital learning by enabling seamless course delivery, student enrollment, and online payment processing. The platform provides a secure and intuitive experience for administrators, instructors, and learners while supporting efficient content management and user engagement.

Responsibilities: -

- Designed and developed a **scalable e-learning platform** using **ASP.NET Core (MVC and Web API)** to manage courses, users, and learning modules.
- Developed **RESTful APIs** with **API versioning**, **JWT Authentication,** and **Swagger/OpenAPI** documentation.
- Integrated **Stripe payment gateway** for secure course purchases, including payment verification, and transaction handling using webhooks.
- Developed and maintained a **CI/CD pipeline** using **Jenkins**, **SonarQube**, and **Nexus Repository** to automate build, **testing**, and deployment processes.
- Applied **SOLID principles and design patterns**, improving code maintainability, scalability, and testability.
- Optimized database operations using **SQL Server**, **stored procedures**, and **indexing** to enhance query performance.
- Participated in code reviews, **bug fixing**, production support, and performance optimization activities.

EDUCATION

Master of Computer Application: MCA Appearing

Bachelor of Computer Application: BCA

GPA: 70%

Language

English

Hindi

Marathi

Project: Yacht All Star

Project Overview*: -*

Yacht Booking System is a modern web-based platform that enables customers to search, compare, and book yachts while allowing yacht owners to manage listings, bookings, and availability. The system is designed to improve operational efficiency, enhance customer experience, and provide a secure, scalable, and reliable yacht rental solution.

Responsibilities: **-**

- Designed and developed scalable **RESTful APIs** using **ASP.NET Core Web API.**
- Developed modules for **Yacht Management**, **Booking Management**, **Payment Management**, and User Management.
- Built **RESTful APIs** with proper **HTTP methods**, status codes, and API versioning, ensuring scalability and seamless client integration.
- Optimized **Entity Framework** Core queries using **LINQ**, **Pagination**, **Filtering**, and **AsNoTracking** .
- Developed the complete **booking workflow**, including **booking requests**, approval/rejection, **cancellation**, and booking history.
- Implemented **Global Exception Handling**, model validation, logging, and API documentation using **Swagger/Open API.**
